

COLLPLANT HOLDINGS LTD (the “Company”)

Re: Completion of private investments

The Company hereby announces that it has successfully completed the fundraising transaction, under the January 18th, 2018 investment agreements with Alpha Capital Anstalt, Docor International B.V. and Mr. Ami Sagi (all together: the “Investors”), according to which the investors invested an amount of approximately 2.2 million NIS in consideration for an allotment of 4,344,340 ordinary shares of the Company.

CollPlant Holdings Ltd.

About CollPlant

CollPlant is a regenerative medicine company leveraging its proprietary, plant-based recombinant human collagen (rhCollagen) technology for the development and commercialization of tissue repair products, initially for the orthobiologics, 3D Bio-printing of tissue and organs, and advanced wound care markets. The Company’s cutting-edge technology is designed to generate and process proprietary rhCollagen, among other patent-protected recombinant proteins. Given that CollPlant’s rhCollagen is identical to the type I collagen produced by the human body, it offers significant advantages compared to currently marketed tissue-derived collagen, including improved biofunctionality, superior homogeneity and reduced risk of immune response. The Company’s broad development pipeline includes biomaterials indicated for orthopedics and advanced wound healing. Lead products include: Vergenix[®]STR (Soft Tissue Repair Matrix), for the treatment of tendinopathy; and Vergenix[®]FG (Flowable Gel) wound filler, for treatment of acute and chronic wounds. CollPlant’s business strategy includes proprietary development and manufacture of tissue repair products and their commercialization and distribution, together with leading third parties, alongside alliances with leading companies for joint development, manufacture and marketing of additional products.
